Profile

Full stack developer. I look at myself as a polyglot engineer, not bound to any technology or software trends, rather using appropriate tools and technology to solve the task at hand. Programming since the year 2007.

Skillset

.NET/Java	Been programming professionally with .NET and it's Framework since early 2009
Python	My scripting go-to language, and the language i started programming in 2007
JavaScript	Knowledgable about JavaScript and it's functional nature, whether the environment is on the client or on the server
HTML/CSS	Intermediate expertise in these client-based technologies
C/x86 Assembly	Can manage in C and also have experience coding x86 (AT&T syntax) assembly

Experience

April 2013 – Present: Venuepoint A/S, Software Developer
Began my career for Venuepoint A/S in 2013, which is a Scandinavian based ticketing company. We run portals such as billetlugen.dk, biljettforum.se and billetportalen.no which based in Denmark, Sweden and Norway respectively

2013: Reykjavík University, Teaching Assistant
Tought a course in Web Programming where we used technologies such as JavaScript, ASP.NET MVC 4, MS SQL

2012: Live Shuttle, Software Developer
Startup company focusing on mobile-solutions, funded by Arion bank of Iceland as a part of the incubator Startup Reykjavík

August 2011 – April 2013: Thekking hf, IT Specialist
Initiated my professional career in 2011 as an IT professional at Thekking hf. There I worked for clients such as the Icelandic Ministry of Finance, Museum of Iceland and more
